

Save the masters and the protectors of the sea!

We are fascinated by them but also fearful of them: sharks. Not many people know that we need them. Sharks are indispensable for the existence of the oceans and their superpowers keep to amaze us. Do you know why sharks like to swim to a cleaning station? Or that they roamed the seas long before the Dinosaurs appeared on our planet?

Shark Heroes shows through bizarre facts and ten heroic shark protectors—captains, deep-sea divers, and modern mermaids—that sharks are the true heroes of the sea.

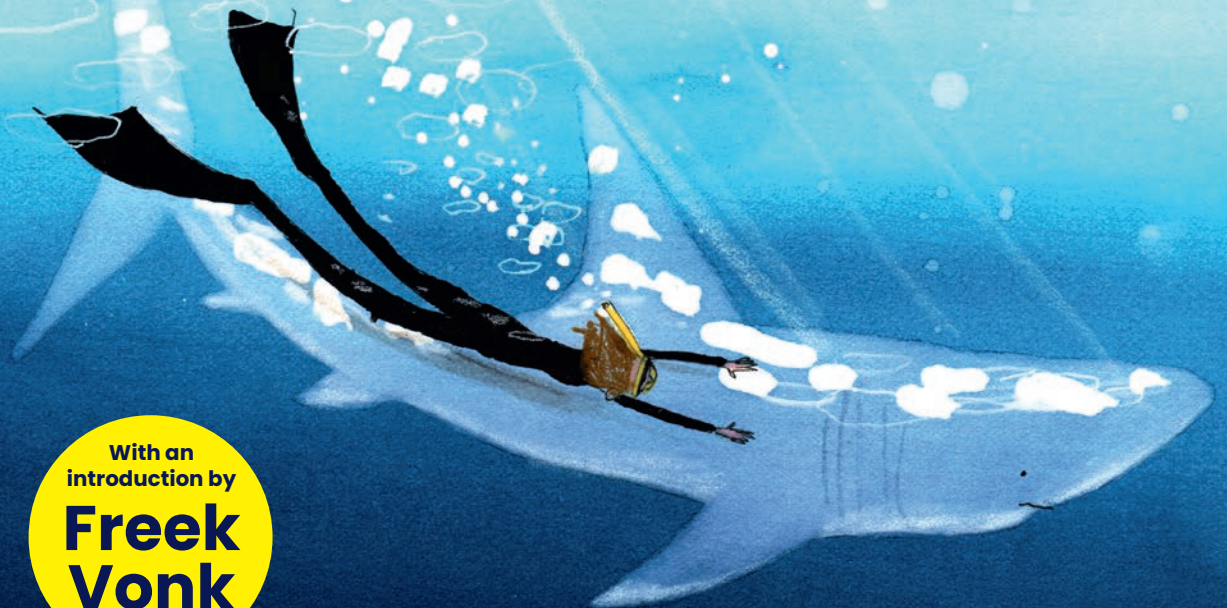

SOPHIE VAN DER STAP reached international acclaim for her debut novel *The Girl With Nine Wigs*. The book was adapted into a movie and was published into more than 20 countries. Sophie was afraid of sharks for a long time. She swam in multiple places with sharks and discovered that they are not dangerous but in danger, and that they are in desperate need of our help. *Shark Heroes* is her first children's book.
